WORK EXPERIENCE

Toptraffic Digital Advertising Agency

Feb '25 — Mar '26 · Russia

Chief Operating Officer

Oversaw operations across 3 units (~30 people): standardized workflows, implemented CRM tracking, and introduced team load and efficiency controls.

Reduced and stabilized client churn by introducing a project-based client framework and portfolio health scoring.

Improved economics in the mobile performance unit by implementing a rebate management system: commitment tracking and buying strategy across key partners.

Led the migration of the influence unit to an internal platform: reduced operational errors and increased team throughput without adding headcount.
